typological theory and its implications for librarianship and

Library Career Development, 16(4), 301-314.

(1998). Profiling librarians with the Myers-Briggs type indicator

Journal of Library Administration, 24(3), 201-215.

Education for Information, 16(1), 57-69.

(2001). Person and context in information seeking: interaction

Cognition, 26(1), 1-15.

ables. New Review of Information Research, 2(1), 1-15.

The image displays a 3D bar chart with 10 bars of varying heights and colors (orange, purple, green). The chart is set against a background of faint, overlapping text from a research paper on information seeking behavior. The text includes references to Cattell, Costa, Crozier, De Raad, Dunn, and others, discussing topics like personality, information seeking, and the Big-Five factor structure.
